Science Fiction Writer’s Association – Johnathan Quebec on Space Films
By Johnathan Quebec

I. IN a Ubik in Mexico

I was there and walking around and even smoked grass and drank some Iochkani cola, and even smoked a lot. I was following space. Most people follow earth. I was following a film to be scientific.

II. IN a Constellation, I saw Astronauts

I was then in a film hall, watching films. I went to Cali the next day, and was at a beach house. I was in fact smoking a lot.

III. Hollywood Films Based on this they asked me to write

Annie – In the Sky there are stars.
